

BREAKFAST SPEAKERS

DICK STRASSBURG

PARTNER/CO-FOUNDER
TEGRA GROUP

Dick was raised on a farm near Brookings, SD, and graduated from NDSU with a degree in Architecture. From his many years of experience, he recognized that small and mid-sized organizations needed the same services offered by in-house facilities departments within large corporations, but have real estate and facility needs perhaps every five, 10, or 20 years. He founded TEGRA 27 years ago with the goal of addressing this service gap. TEGRA has a staff of nine professionals and has worked with over 300 clients, based in Minnesota and South Dakota, on a wide range of unique projects of varying scales and complexity. TEGRA prides itself on its strong record of delivering projects on time and under budget, with experience in pre-fab construction uses and trends in the medical/biotech industry.

AARON EICH

SENIOR PROJECT MANAGER
JOURNEY CONSTRUCTION

With a Bachelor of Science degree in Manufacturing Engineering from SDSU, Aaron possesses exceptional communication skills and a perceptiveness that has earned him respect as a team leader in the constantly evolving construction industry. He has accumulated over 17 years of experience, which includes knowledge in the medical and biotech industries, as well as pre-fab construction. Aaron is a beneficiary of a seasoned construction partner who will safeguard interests and deliver a best-value project.

BRENT SMITH

PROJECT MANAGER
JOURNEY CONSTRUCTION

Brent Smith is an accomplished project manager with Journey Construction, bringing over 15 years of valuable experience to the construction industry. Throughout his career, Brent has demonstrated a keen eye for detail and a knack for effective communication, allowing him to consistently deliver successful projects. His passion for building has led him to become a respected leader in his field, and he takes pride in delivering quality work that exceeds his clients' expectations. Furthermore, he also obtains expertise in pre-fab construction in addition to the medical and biotech fields. With Brent at the helm, any construction project is in good hands.

JAMIE MUTCHELKNAUS

VDC/ BIM MANAGER
JOURNEY GROUP

Jamison has been in the VDC industry for over eighteen years, within the architectural field. Jamison understands the construction process and knows how to ask the right questions. He thrives on challenges and uses his knowledge to establish, sustain, and accomplish clear project objectives. With over twelve years of experience using Revit and Building Information Modeling software, Jamison provides project teams with a unique perspective on the entire construction process while delivering highly successful projects within pre-fab construction, as well as the biotech and medical areas. Jamison understands how important innovation is and is excited to use these services to better plan, while also saving time and money. His passion for teamwork and collaboration will be a benefit to anyone seeking VDC and BIM services.
